

# MINI WINCH 3020

Sahlins Mini Winch is a small and portable winch for pulling pilot ropes or small cables in well openings, pipes etc. The winch is placed on the well opening and the pilot rope is drawn via an aluminum bull wheel.

The engine used is a robust 4-stroke - 3 hp petrol engine.

The lightweight construction allows a person to transport and handle the winch himself. Sahlins mini-winch can be

customized to fit most existing well openings.
